

C Program : GATE 2019

Consider the following C function.

```
void convert(int n){  
  
    if(n<0)  
  
        printf("%d",n);  
  
    else {  
  
        convert(n/2);  
  
        printf("%d",n%2);  
  
    }  
  
}
```

Which one of the following will happen when the function convert is called with any positive integer n as argument?
