PRINCIPLES OF PROGRAMMING LANGUAGES

PRACT. Write a program in C++ to implement call by value parameter passing Methods.

```
#include <iostream>
using namespace std;
void show(int x)
{
   cout<<x<<endl;
}
int main()
{
   int age = 20;
   show(age);
   show(10);
   return 0;
}
```
