

#1. Which cloud deployment model involves a combination of public and private clouds, allowing data and applications to be shared between them?

☐

Hybrid Cloud

☐

Public Cloud

☐

Private Cloud

☐

Community Cloud

☐

Personal Cloud

#2. What is the term for a service that provides on-demand access to a large pool of computing resources over the internet?

☐

Cloud Computing

☐

Virtualization

☐

Edge Computing

☐

Distributed Computing

☐

Cluster Computing

#3. Which cloud service model provides a platform for developing, testing, and deploying applications without the need to manage the underlying infrastructure?

☐

PaaS

☐

SaaS

☐

IaaS

☐

DaaS

☐

XaaS

#4. What is the term for the process of dividing a single physical server into multiple virtual servers, each with its own operating system and resources?

☐

Virtualization

☐

Partitioning

☐

Segmentation

☐

Allocation

☐

Segregation

#5. Which cloud service model provides access to software applications over the internet on a subscription basis?

☐

SaaS

☐

PaaS

☐

IaaS

☐

DaaS

☐

XaaS

#6. What is the term for a cloud deployment model where resources are shared among multiple users or tenants?

☐

Multi-tenancy

☐

Multi-user

☐

Single-tenancy

☐

Single-user

☐

Co-tenancy

#7. Which cloud service model offers the most control and customization for users?

☐

IaaS

☐

PaaS

☐

SaaS

☐

DaaS

☐

XaaS

#8. What is the term for a cloud deployment model that is accessible to anyone on the internet and is owned and operated by a third-party cloud service provider?

☐

Public Cloud

☐

Private Cloud

☐

Hybrid Cloud

☐

Community Cloud

☐

Personal Cloud

#9. Which company's cloud computing service is known as Google Cloud Platform (GCP)?

☐

Google

☐

Microsoft

☐

Amazon

☐

IBM

☐

Oracle

#10. What is the term for the practice of using a mix of on-premises, private cloud, and public cloud services to meet the specific needs of an organization?

☐

Multi-cloud

☐

Hybrid Cloud

☐

Omni-cloud

☐

Cross-cloud

☐

Inter-cloud

#11. Which cloud service model provides a comprehensive software application that is accessed over a network?

☐

SaaS

☐

PaaS

☐

IaaS

☐

DaaS

☐

XaaS

#12. What is the term for a cloud deployment model that is designed for a specific industry or group of organizations?

☐

Community Cloud

☐

Public Cloud

☐

Private Cloud

☐

Hybrid Cloud

☐

Personal Cloud

#13. Which cloud service model allows users to rent virtualized hardware resources over the internet?

☐

IaaS

☐

PaaS

☐

SaaS

☐

DaaS

☐

XaaS

#14. What is the term for a network of physical servers that work together to provide high availability and reliability?

☐

Cluster

☐

Grid

☐

Farm

☐

Pool

☐

Array

#15. Which of the following is a popular cloud computing service provided by Alibaba Cloud?

☐

Alibaba Cloud

☐

Azure

☐

Google Cloud Platform

☐

AWS

☐

Oracle Cloud

#16. What is the term for the process of managing multiple containers that work together to deliver a single application or service?

☐

Orchestration

☐

Containerization

☐

Management

☐

Deployment

☐

Automation

#17. Which cloud deployment model is a combination of public and private clouds with data and applications shared between them?

☐

Hybrid Cloud

☐

Public Cloud

☐

Private Cloud

☐

Community Cloud

☐

Personal Cloud

#18. What is the term for a cloud service model that provides access to a platform for developing, testing, and deploying applications?

☐

PaaS

☐

SaaS

☐

IaaS

☐

DaaS

☐

XaaS

#19. Which company's cloud computing service is known as AWS (Amazon Web Services)?

☐

Amazon

☐

Microsoft

☐

Google

☐

IBM

☐

Oracle

#20. What is the term for the practice of using a network of remote servers hosted on the Internet to store, manage, and process data?

☐

Cloud Computing

☐

Virtualization

☐

Distributed Computing

☐

Edge Computing

Cluster Computing
