#1. Which cloud service model provides virtualized computing resources over the
internet?
laaS
PaaS
SaaS
DaaS
XaaS
#2. What is the term for a cloud deployment model that is operated for the use of
a specific community or organization?
a specific community or organizations
Community Cloud
Public Cloud
Private Cloud
Hybrid Cloud
Personal Cloud
#3. Which cloud service model provides access to software applications over the
internet without the need for installation on local devices?
SaaS

PaaS
laaS
DaaS
XaaS
#4. What is the term for a cloud deployment model where the cloud infrastructure is operated solely for a single organization?
Private Cloud
Public Cloud
Lybrid Claud
Hybrid Cloud
Community Cloud
Personal Cloud
#5. Which of the following is an example of a widely used cloud storage service provided by Microsoft?
OneDrive
Google Drive
iCloud
Dropbox

□ Box
#6. What is the term for the practice of using multiple cloud computing services in conjunction with one another?
Multi-cloud
Hybrid Cloud
Cross-cloud
Omni-cloud
Inter-cloud
#7. Which cloud deployment model is typically used for highly sensitive data and
requires a high level of security?
Private Cloud
Public Cloud
Hybrid Cloud
Community Cloud
Personal Cloud
#8. What is the term for a software tool used for managing and deploying applications within containers?
Container Orchestration

Containerization
Container Management
Container Deployment
Container Automation
#9. Which of the following is a potential benefit of using a public cloud service?
Cost-effectiveness
High Scalability
Enhanced Security
Full Control
Limited Accessibility
#10. What is the term for the practice of dividing a single physical server into
multiple virtual servers, each with its own operating system and resources?
Virtualization
Partitioning
Segmentation
Allocation
Segregation

#11. Which cloud service model provides a platform for developing, testing, and deploying applications without the need to manage the underlying infrastructure?
□ PaaS □ SaaS □ laaS □ DaaS □ XaaS
#12. What is the term for the ability to quickly increase or decrease computing resources as needed?
Scalability Flexibility Elasticity Robustness #13. Which type of cloud deployment model shares computing resources between
multiple organizations?
Community Cloud Public Cloud

Private Cloud Hybrid Cloud Personal Cloud #14. What is the term for the practice of using a network of remote servers hosted on the Internet to store, manage, and process data, rather than a local server or a personal computer?
Cloud Computing Virtualization Distributed Computing Edge Computing Cluster Computing #15. Which cloud deployment model offers the highest level of control and customization?
Private Cloud Public Cloud Hybrid Cloud Community Cloud

Personal Cloud
#16. Which type of cloud deployment model combines both public and private
cloud elements?
Hybrid Cloud
 Public Cloud
 Private Cloud
Community Cloud
Personal Cloud
#17. What is the term for a cloud deployment model that is operated solely for a
single organization?
 Private Cloud
Public Cloud
Hybrid Cloud
Community Cloud
Personal Cloud
#18. Which cloud service model provides virtualized computing resources over the
internet?
laaS

PaaS
SaaS
DaaS
XaaS
#19. What is the term for a software application that is hosted in a remote server
and delivered over the internet?
Web Application
Cloud Application
Remote Application
Virtual Application
Distributed Application
#20. What is the term for the process of managing multiple containers that work
together to deliver a single application or service?
Orchestration
Containerization
Management
Deployment

Automation
