

#1. Which network device is used to amplify and regenerate data signals in order to extend the range of a network?

Repeater

Repeater

Switch

Switch

Router

Router

Hub

Hub

Modem

Modem

#2. What is the primary purpose of an email client program?

To send, receive, and manage email messages

To send, receive, and manage email messages

To encrypt data for secure transmission

To encrypt data for secure transmission

To filter incoming emails

To filter incoming emails

To convert analog signals to digital

To convert analog signals to digital

To manage printer settings

To manage printer settings

#3. Which type of network is typically used for connecting devices within a home or office environment?

LAN (Local Area Network)

LAN (Local Area Network)

WAN (Wide Area Network)

WAN (Wide Area Network)

MAN (Metropolitan Area Network)

MAN (Metropolitan Area Network)

WLAN (Wireless Local Area Network)

WLAN (Wireless Local Area Network)

PAN (Personal Area Network)

PAN (Personal Area Network)

#4. What is the main purpose of a firewall in a computer network?

To protect against unauthorized access and malicious activity

To protect against unauthorized access and malicious activity

To enhance download speed

To enhance download speed

To store files in the cloud

To store files in the cloud

To convert analog signals to digital

To convert analog signals to digital

To print documents

To print documents

#5. Which protocol is used for secure remote login and file transfer over a network?

SSH (Secure Shell)

SSH (Secure Shell)

FTPS (File Transfer Protocol Secure)

FTPS (File Transfer Protocol Secure)

HTTP

HTTP

SMTP

SMTP

POP

POP

#6. What is the purpose of a MAC address in networking?

It is a unique identifier for a network interface card

It is a unique identifier for a network interface card

It encrypts data for secure transmission

It encrypts data for secure transmission

It filters incoming emails

It filters incoming emails

It converts analog signals to digital

It converts analog signals to digital

It manages printer settings

It manages printer settings

#7. What is the main function of a DNS cache in a computer system?

It stores recently accessed DNS records to speed up future lookups

It stores recently accessed DNS records to speed up future lookups

It encrypts data for secure transmission

It encrypts data for secure transmission

It filters incoming emails

It filters incoming emails

It converts analog signals to digital

It converts analog signals to digital

It manages printer settings

It manages printer settings

#8. In a network, what does the term "bandwidth" refer to?

The maximum data transfer rate of a network connection

The maximum data transfer rate of a network connection

The physical width of a network cable

The physical width of a network cable

The distance between devices on a network

The distance between devices on a network

The number of devices connected to a network

The number of devices connected to a network

The speed of data transmission on a network

The speed of data transmission on a network

#9. Which wireless encryption protocol is considered the most secure as of 2022?

WPA3

WPA3

WEP

WEP

WPA2

WPA2

WPA

WPA

None of the above

None of the above

#10. What is the purpose of a subnet in a computer network?

It divides a large network into smaller, more manageable segments

It divides a large network into smaller, more manageable segments

It encrypts data for secure transmission

It encrypts data for secure transmission

It filters incoming emails

It filters incoming emails

It converts analog signals to digital

It converts analog signals to digital

It manages printer settings

It manages printer settings

#16. What is the primary function of a router in a computer network?

To forward data packets between different networks

To forward data packets between different networks

To encrypt data for secure transmission

To encrypt data for secure transmission

To filter incoming emails

To filter incoming emails

To convert analog signals to digital

To convert analog signals to digital

To manage printer settings

To manage printer settings

#17. Which network device is used to connect multiple networks together and make decisions about where to send data packets?

Router

Router

Switch

Switch

Hub

Hub

Modem

Modem

Firewall

Firewall

#18. Which protocol is used for transferring files over a secure connection (encrypted) on a network?

SFTP (SSH File Transfer Protocol)

SFTP (SSH File Transfer Protocol)

FTPS (File Transfer Protocol Secure)

FTPS (File Transfer Protocol Secure)

TFTP (Trivial File Transfer Protocol)

TFTP (Trivial File Transfer Protocol)

HTTP

HTTP

SMTP

SMTP

#19. What is the purpose of VLAN (Virtual LAN) in networking?

It allows logical segmentation of a network, even if devices are physically located on the same network switch

It allows logical segmentation of a network, even if devices are physically located on the same network switch

It encrypts data for secure transmission

It encrypts data for secure transmission

It filters incoming emails

It filters incoming emails

It converts analog signals to digital

It converts analog signals to digital

It manages printer settings

It manages printer settings

#20. What is the main purpose of a DNS cache in a computer system?

It stores recently accessed DNS records to speed up future lookups

It stores recently accessed DNS records to speed up future lookups

It encrypts data for secure transmission

It encrypts data for secure transmission

It filters incoming emails

It filters incoming emails

It converts analog signals to digital

It converts analog signals to digital

It manages printer settings

It manages printer settings
