

Differentiate between recursive descent parsing and predictive parsing.

S. No.	Recursive Descent Parsing	Predictive Parsing
1.	Uses recursive routines to parse.	Uses a parsing table for parsing.
2.	Converts production rules into code directly.	Constructs a parsing table based on grammar rules.
3.	Does not build a parsing table.	Constructs a parsing table beforehand.
4.	Does not use First and Follow sets explicitly.	Utilizes First and Follow sets to build parsing table.
