Differentiate between structured approach and object oriented approach

Feature	Structured Approach	Object-Oriented Approach
Approach	Top-down approach	Bottom-up approach
Organization	Program divided into sub-modules or functions	Program organized using classes and objects
Communication	Function call is used	Message passing is used
Reusability	Software reuse is not possible	Reusability is possible
Design Integration	Structured design typically left until end phases	Object-oriented design done concurrently with other phases
Suitability	More suitable for off-shoring	More suitable for in-house development
Transition from Design to Implementation	Clear transition from design to implementation	Not so clear transition from design to implementation
Applicability	Suitable for real-time systems, embedded systems, projects where objects are not the most useful level of abstraction	Suitable for most business applications, game development projects, and projects that require customization or extension
Modeling	DFD & E-R diagram model the data	Class diagram, sequence diagram, state chart diagram, and use cases contribute to modeling
Project Management	Projects can be managed easily due to clearly identifiable phases	Projects can be difficult to manage due to uncertain transitions between phases

4. Describe steps of object-oriented design.
5. Write short notes on : Compare procedural programming with object-oriented programming with examples.
6. What do you understand by object-oriented technology ?Discuss the pros and cons of object-oriented technology with suitable example.
7. What do you understand by object identity ? Explain with an example.
8. Explain encapsulation with example.OR Discuss the concept of encapsulation with suitable example.OR What do you mean by encapsulation ? How does the object-oriented concept of message passing help to encapsulate the implementationof an object, including its data ?
9. Write short note on information hiding.
10. What do you mean by polymorphism ? Explain it with an example. OR What do you mean by polymorphism ? Is this concept only applicable to object-oriented systems ? Explain. OR Define polymorphism. Is this concept only applicable to object oriented systems ? Explain.
11. What do you mean by modeling ? Discuss several purposes served by models with suitable examples.
12. What are the different models used in object oriented languages ?OR Write short note on dynamic modeling and functional modeling.
13. Write short notes on : a. Data store b. Actors c. Control flow
14. What are the principles of modeling ? What is the importance of modeling ?, OR What

are the basic principles of modeling ? Explain in detail.

15. Define object-oriented modeling (OOM). Describe variousstеps involved in OOM process. Explain.
16. Define link and association. Discuss the role of link and association in object modeling with suitable example.
17. What do you mean by object modeling technique ? Explain. Discuss the various stages of the object modeling techniques with some example.
18. Wire is used in the following applications. For each of the following applications, prepare a list of wire characteristics that are relevant and also explain why each characteristic is important for the application : (1) Designing the filament for a light bulb; (2) Designing the electrical system for an air plane.
19. What do you mean by UML ? Discuss the conceptual model of UML with the help of an appropriate example. give the conceptual model of UML. Use some example to illustrate the model in detail using diagram.
20. Describe the pros and cons of unified modeling language(UML).
21. Why UML required ? What are the basic architecture ofUML ?
22. What do you understand by architectural modeling ?Explain its various concepts and diagrams with suitable example. ORWrite short notes on architectural modeling with suitable exampleand diagrams.
23. What do you understand by classes in object oriented system design ?
24. Explain relationship with its different types.
25. Describe generalization and specialization.OR What do you mean by generalization ? Explain. How is it related with inheritance ? OR Define aggregation and generalization. Explain.
26. Categorize the following relationship into generalization, aggregation, or association :
27. Explain class and object diagrams with examples.
28. Differentiate between a class and object with some example. Also prepare a list of

objects that you would expect each of the following systems to handle : (1) a program for laying out a news paper, (2) a catalog store order entry system.

29. Prepare a portion of an object diagram for a library book checkout system that shows the date a book is due and the late charges for an over due book as derived objects.
30. What do you mean by a collaboration diagram ? Explain various terms and symbols used in a collaboration diagram. How polymorphism is described using a collaboration diagram ? Explain using an example. OR What is a collaboration diagram ? How polymorphism is represented in a collaboration diagram? Explain with an example.
31. Explain Polymorphism, Iterated Messages and use of self in message in collaboration diagram.
32. What do you mean by sequence diagram? Explain various terms and symbols used in a sequence diagram. Describe the following using sequence diagram : (i) asynchronous messages with/without priority. (ii) broadcast messages.explain sequence diagrams with example.
33. Discuss in brief basic behavioural modeling.
34. Write a short note on use case diagram and time diagram with suitable diagram and their utility in system design.
35. Define package. Explain the package diagram with suitable diagram. OR What are package diagrams and why are they used ?
36. Write short notes on use case diagram with suitable diagram and their utility in system design.
37. What do you mean by activity diagram ? Explain indetail. OR What do you mean by activity diagram ? What are the two special states shown in an activity diagram ? Explain with an example.
38. What do you mean by event ? What are the types of event explain with example ?
39. Explain use case with example. How are the diagrams divided ?
