

Discuss technical consideration in interface design for : i. Graphical system ii. Web system iii. Other web consideration

## Graphical System:

**Compatibility:** Ensure the design aligns with the system's power, screen size, resolution, and display features.

**Browser and Platform Consideration:** Designs for web systems must factor in browser characteristics, bandwidth, and adhere to platform style guides.

**System Capabilities:** Consider the system's processing speed, memory, and responsiveness for effective user interaction.

**Screen Size and Resolution:** Design should accommodate different monitor sizes and resolutions to ensure optimal display.

**Color and Display Features:** Choose a color palette that works across various systems and utilize available display features effectively.

## Web Systems:

**User Diversity:** Recognize the diversity in user technologies, including monitors, color displays, and internet speed.

**Browsers Compatibility:** Design for various browsers and consider users with older browsers, avoiding overly complex technologies.

**Monitor Size and Resolution:** Restrict content within a safe area to avoid horizontal scrolling and accommodate varying screen sizes and resolutions.

Discuss technical consideration in interface design for : i. Graphical system ii. Web system iii. Other web consideration

**Font Consideration:** Be aware of different default fonts on various browsers and ensure legibility across platforms.

**Bandwidth Optimization:** Consider the bandwidth of users; optimize content for slower connections without sacrificing quality.

**Color Palette:** Use a browser-safe, cross-platform color palette to ensure consistent and accurate color representation.

**Multiple Versions:** Provide multiple versions to support different browsers and use browser sniffers to detect and serve the appropriate version.

## Other Web Considerations:

**Download Speed:** Optimize graphics and page size for quick downloads, aiming for 8 to 10 seconds per page.

**Currency of Information:** Regularly update the website to maintain credibility and trustworthiness.

**Page Printing:** Make printing easy for users, allowing them to print sections or pages with minimal effort.

**Maintainability:** Design for easy maintenance, allowing quick updates without extensive reformatting, and remove outdated information.

Discuss technical consideration in interface design for : i. Graphical system ii. Web system iii. Other web consideration

1. What do you mean by user interface ? Define user interface design. Why user interface is important ?
2. Describe the importance of good design.
3. What are the benefits of good design ?
4. Write a short note on history of screen design.
5. What do you mean by graphical user interface ?
6. What is popularity of graphics ?
7. Describe the concept of direct manipulation
8. What is graphical system ? Write down its advantages and disadvantages.
9. Describe the characteristics of graphical system.
10. Describe the characteristics of intranet versus the internet.
11. What are the usability problems in graphical system ?
12. Explain web user interface.
13. Discuss the popularity of web interface.
14. What are the characteristics of web user interface ?
15. Describe the principles of user interface.
16. Describe the principles established the foundation for graphical interfaces.
17. Describe the design goals in creating user interface.
18. Why web user interface design difficult ?
19. Explain the five commandments for designing user interface
20. Discuss human computer interaction.
21. How a person interact with computer.
22. What are the factors that make system difficult to use ?
23. What are the psychological responses to poor design ?
24. What are the physical reactions to poor design ?
25. Explain the important human characteristics.
26. Describe the following term with respect to human characteristics in design :

Discuss technical consideration in interface design for : i. Graphical system ii. Web system iii. Other web consideration

27. Describe human consideration in design.
28. What are the characteristics of mandatory use in user's task for design ?
29. Give the characteristics of discretionary user
30. Explain human interaction speed.
31. What are the methods for gaining an understanding of users ?
32. Discuss business and requirement analysis.
33. Designing a website, what kinds of interview questions are appropriate for asking users ?
34. Explain focus group. What are steps in setting up a focus group ?
35. Explain card sorting for websites.
36. Describe the steps for creating electronic survey.
37. Determine the basic business functions.
38. What is screen design ? Define a well designed screen.
39. Describe the goals in screen design.
40. What is meant by screen and define its purpose.
41. How we can organize screen elements clearly and meaningfully ?
42. Describe ordering of screen data and content.
43. What do you mean screen navigation and flow ?
44. What do you understand by visually pleasing composition ?
45. Discuss the perceptual principles that can be used to aid screen functional groupings.
46. How to group screen elements using border ?
47. Discuss amount of information.
48. Discuss the following :
49. How to minimize the problems in scrolling ?
50. Discuss about the term 'Distinctiveness'.
51. Discuss the techniques to provide emphasis.
52. How to convey depth of levels or a three-dimensional appearance ?

Discuss technical consideration in interface design for : i. Graphical system ii. Web system iii. Other web consideration

53. How information is presented simply and meaningfully ?
54. Discuss about typography.
55. Discuss about information entry and modification screens.
56. What are the types of statistical graphics ?
57. Discuss intranet and extranet design guidelines.
58. Write short note on statistical graphics
59. Explain the components of statistical graphics.
60. Discuss windows and its characteristics.
61. What are the components of window ?
62. Describe the window presentation style.
63. What are the advantages of tiled window and overlapping window ?
64. What are the different types of windows ?
65. Explain different window management schemes.
66. Describe the structure of menus.
67. Discuss the functions of menus.
68. What are website navigation problems ?
69. What are the various task performed by device-based controls.
70. Discuss various device based controls.
71. What are the advantages and disadvantages of :i. Trackball ii. Joystickiii. Graphic tablet  
iv. Touch screen
72. Discuss the guidelines for selecting proper device-based controls.
73. What are selection controls ?
74. Describe the various operable controls.
75. What is text ? How we present and write text ?
76. Discuss text for web pages.
77. Write a short note on message.
78. What are the message box guidelines recommended by Microsoft ?
