

How information is presented simply and meaningfully ?

1. Legibility:

- What it means: Make sure the text is clear and easy to read.
- How to do it:
  - Use the right type of font at a good size.
  - Ensure there's enough contrast between text and background.
  - Note: Text on screens may not be as clear as on paper.

2. Readability:

- What it means: Make the words easy to recognize and understand.
- How to do it:
  - Pay attention to word shapes, not just individual letters.
  - Use letters that go up (ascenders) or down (descenders) for distinctive shapes.

3. Usability:

- What it means: Present information in a way that's easy to use without needing extra steps.
- How to do it:
  - Avoid making users refer to extra documentation.
  - Words and text are quicker to understand than graphics in design.

4. Contrasting Display Features:

- What it means: Use differences in style, size, and color to draw attention to important items.
- How to do it:
  - Make important things stand out with different fonts, sizes, or colors.
  - Help users quickly identify and focus on specific items.

5. Visual Lines:

- What it means: Guide the eye smoothly across the screen with the layout and design.

How information is presented simply and meaningfully ?

- How to do it:
  - Use white space, fonts, and alignments to lead the eye.
  - Avoid random eye movement; keep it purposeful and straightforward.

6. Consistency:

- What it means: Keep a uniform look and usage throughout the presentation of information.
- How to do it:
  - Always use the same visual style and procedures.
  - Ensure a consistent appearance and user experience.
