

Published on: 2022/05/25

Step 01 : Login to cloudflare.com

Step 02: Select website

Step 03: Go to DNS settings

Step 04: Click on Add record

Step 05:

Do following settings:

```
Type : CNAME
Name : Subdomain name (Like admission in
admission.easyexamnotes.com)
Target : @ or Domain name
Proxy status : Enabled
TTL : Auto
```

Above settings are sufficient.

But, if you still get error like, subdomain not point to IP.

Then client certificates may be mission.

Then follow the steps mentioned on this page to generate client certificates.
