> In a city there are 100000 people, $64 \%$ of them speak Greek, $55 \%$ people speak Latin, $43 \% \mathrm{p}$

## DAVV MBA PYQ

In a city there are 100000 people, $64 \%$ of them speak Greek, $55 \%$ people speak Latin, $43 \%$ people speak French, $21 \%$ people speak both Greek and Latin, $31 \%$ people speak both Greek and French, and $41 \%$ people speak both Latin and French. Determine the number of people speak all the three languages.
Solution:
G for Greek
L for Latin
F for French
Formula:
$n(G U L U F)=n(G)+n(L)+n(F)-n(G \cap L)-n(G \cap F)-n(L \cap F)+n(G \cap L \cap F)$
Given,

```
\(n(G \operatorname{L}\) U F) \(=100000\)
\(n(G)=64 \%=64000\)
\(n(L)=55 \%=55000\)
\(n(F)=43 \%=43000\)
\(n(G \cap L \cap F)=\) ?
\(n(G \cap L)=21 \%=21000\)
\(n(G \cap F)=31 \%=31000\)
\(n(L \cap F)=41 \%=41000\)
\(n(G U L U F)=n(G)+n(L)+n(F)-n(G \cap L)-n(G \cap F)-n(L \cap F)+n(G \cap L \cap F)\)
\(100000=64000+55000+43000-21000-31000-41000+n(G \cap L \cap F)\)
\(n(G \cap L \cap F)=31000\)
```

Number of people speak all the three languages $=31000$.
Practice questions (DAVV MBA PYQs):

In a city there are 100000 people, $64 \%$ of them speak Greek, $55 \%$ people speak Latin, $43 \% \mathrm{p}$

Q1. In a city there are 100000 people, $64 \%$ of them speak Greek, $55 \%$ people speak Latin, $43 \%$ people speak French, $21 \%$ people speak both Greek and Latin, $31 \%$ people speak both Greek and French, and $41 \%$ people speak both Latin and French. Determine the number of people speak all the three languages.
Solution: Click Here
Q2. In a survey of 500 T.V. viewers, 285 watched KBC, 195 watch cricket, 115 watch hockey, 45 watch KBC and hockey, 70 watch KBC and cricket, 50 watch cricket and hockey, 50 do not watch any of three games. How many watch all 3 and how many watch exactly one of three ? Solution: Click Here
Q3. In a managers club, 45 play polo, out of which 30 play Polo only 28 play Snookers. 25 play Tennis of which 11 play Tennis only, 7 play Tennis and Polo, but not Snooker. 5 play Polo and Snooker, but not Tennis
i) How many play all the thre sports?
ii) How many play Snookers only?
iii) How many members are there is the club.
