

#1. What is the role of a learning rate in gradient descent optimization?

☐ It controls the size of the steps taken during optimization

It controls the size of the steps taken during optimization

☐ It determines the number of training samples

It determines the number of training samples

☐ It specifies the number of features in the dataset

It specifies the number of features in the dataset

☐ It defines the number of iterations in training

It defines the number of iterations in training

☐ It adjusts the complexity of the model

It adjusts the complexity of the model

#2. In a neural network, what is the purpose of the activation function?

☐ To introduce non-linearity into the model

To introduce non-linearity into the model

☐ To reduce the number of parameters

To reduce the number of parameters

☐ To improve the interpretability of the model

To improve the interpretability of the model

☐ To speed up the training process

To speed up the training process

☐ To add noise to the data

To add noise to the data

#3. Which type of machine learning algorithm is well-suited for recommendation systems?

☐ Collaborative Filtering

Collaborative Filtering

☐ Decision Trees

Decision Trees

☐ Support Vector Machines (SVM)

Support Vector Machines (SVM)

☐ K-Means Clustering

K-Means Clustering

☐ Linear Regression

Linear Regression

#4. What is the objective of Principal Component Analysis (PCA) in dimensionality reduction?

☐ To project data onto a lower-dimensional subspace while retaining the most important information

To project data onto a lower-dimensional subspace while retaining the most important information

☐ To increase the number of features in the dataset

To increase the number of features in the dataset

☐ To separate data into distinct clusters

To separate data into distinct clusters

☐ To minimize the training time

To minimize the training time

☐ To transform data into a non-linear space

To transform data into a non-linear space

#5. What is the main advantage of using an ensemble learning method like Random Forest?

☐ It reduces overfitting and increases model robustness

It reduces overfitting and increases model robustness

☐ It simplifies the model and improves interpretability

It simplifies the model and improves interpretability

☐ It speeds up the training process

It speeds up the training process

☐ It eliminates the need for feature engineering

It eliminates the need for feature engineering

☐ It requires fewer training samples

It requires fewer training samples

#6. In which phase of a machine learning project is cross-validation typically applied?

☐ Model evaluation

Model evaluation

☐ Data preprocessing

Data preprocessing

☐ Model training

Model training

☐ Model deployment

Model deployment

☐ Data collection

Data collection

#7. What is the purpose of L1 regularization (Lasso) in linear regression?

☐ It encourages sparsity by penalizing the absolute values of coefficients

It encourages sparsity by penalizing the absolute values of coefficients

☐ It increases the number of features in the model

It increases the number of features in the model

☐ It adds noise to the data

It adds noise to the data

☐ It reduces the complexity of the model

It reduces the complexity of the model

☐ It enforces non-negativity of coefficients

It enforces non-negativity of coefficients

#8. Which algorithm is used for finding frequent itemsets in association rule mining?

☐ Apriori algorithm

Apriori algorithm

☐ K-Means Clustering

K-Means Clustering

☐ Naive Bayes

Naive Bayes

☐ Decision Trees

Decision Trees

☐ Support Vector Machines (SVM)

Support Vector Machines (SVM)

#9. What is the objective of batch normalization in deep learning?

☐ To stabilize and speed up the training process

To stabilize and speed up the training process

☐ To reduce the number of parameters in the model

To reduce the number of parameters in the model

☐ To increase the learning rate

To increase the learning rate

☐ To add noise to the data

To add noise to the data

☐ To simplify the model

To simplify the model

#10. Which technique is used to combat the class imbalance problem in classification tasks?

☐ Resampling (e.g., oversampling or undersampling)

Resampling (e.g., oversampling or undersampling)

☐ Bagging

Bagging

☐ Pruning

Pruning

☐ Feature selection

Feature selection

☐ Dimensionality red

Dimensionality red

#11. What is the objective of a support vector machine (SVM) in classification tasks?

☐ To find the hyperplane that maximizes the margin between classes

To find the hyperplane that maximizes the margin between classes

☐ To reduce model complexity

To reduce model complexity

☐ To perform feature selection

To perform feature selection

☐ To maximize prediction accuracy

To maximize prediction accuracy

☐ To minimize the number of features

To minimize the number of features

#12. Which technique is used for handling multicollinearity in linear regression?

☐ Ridge regression

Ridge regression

☐ L1 regularization (Lasso)

L1 regularization (Lasso)

☐ Principal Component Analysis (PCA)

Principal Component Analysis (PCA)

☐ Logistic regression

Logistic regression

☐ K-Nearest Neighbors (KNN)

K-Nearest Neighbors (KNN)

#13. What is the purpose of dropout regularization in deep learning?

☐ To prevent overfitting by randomly dropping out neurons during training

To prevent overfitting by randomly dropping out neurons during training

☐ To increase the number of hidden layers

To increase the number of hidden layers

☐ To speed up the training process

To speed up the training process

☐ To add noise to the data

To add noise to the data

☐ To reduce the learning rate

To reduce the learning rate

#14. In reinforcement learning, what is the role of the reward function?

☐ It provides feedback to the agent about its actions

It provides feedback to the agent about its actions

☐ It specifies the number of episodes in training

It specifies the number of episodes in training

☐ It determines the number of states in the environment

It determines the number of states in the environment

☐ It controls the exploration rate

It controls the exploration rate

☐ It sets the learning rate

It sets the learning rate

#15. Which type of learning algorithm can perform online learning (i.e., learn continuously from new data)?

☐ Incremental learning

Incremental learning

☐ Batch learning

Batch learning

☐ Reinforcement learning

Reinforcement learning

☐ Unsupervised learning

Unsupervised learning

☐ Semi-supervised learning

Semi-supervised learning

#16. What is the purpose of the term "momentum" in gradient descent optimization?

☐ To help accelerate convergence and escape local minima

To help accelerate convergence and escape local minima

☐ To reduce the learning rate

To reduce the learning rate

☐ To add noise to the data

To add noise to the data

☐ To increase the number of features

To increase the number of features

☐ To regularize the model

To regularize the model

#17. Which method is used for feature extraction in natural language processing (NLP)?

☐ Word Embeddings (e.g., Word2Vec, GloVe)

Word Embeddings (e.g., Word2Vec, GloVe)

☐ Principal Component Analysis (PCA)

Principal Component Analysis (PCA)

☐ Support Vector Machines (SVM)

Support Vector Machines (SVM)

☐ K-Means Clustering

K-Means Clustering

☐ Decision Trees

Decision Trees

#18. What is the goal of hierarchical clustering in unsupervised learning?

☐ To group similar data points into clusters based on their proximity

To group similar data points into clusters based on their proximity

☐ To classify data into predefined categories

To classify data into predefined categories

☐ To maximize prediction accuracy

To maximize prediction accuracy

☐ To minimize model complexity

To minimize model complexity

☐ To reduce the number of features

To reduce the number of features

#19. Which algorithm is commonly used for time series forecasting in machine learning?

☐ ARIMA (AutoRegressive Integrated Moving Average)

ARIMA (AutoRegressive Integrated Moving Average)

☐ Naive Bayes

Naive Bayes

☐ Support Vector Machines (SVM)

Support Vector Machines (SVM)

☐ K-Nearest Neighbors (KNN)

K-Nearest Neighbors (KNN)

☐ Decision Trees

Decision Trees

#20. What is the purpose of a learning rate scheduler in deep learning?

☐ To dynamically adjust the learning rate during training

To dynamically adjust the learning rate during training

☐ To add noise to the data

To add noise to the data

☐ To increase the number of hidden layers

To increase the number of hidden layers

☐ To reduce model complexity

To reduce model complexity

☐ To speed up the training process

To speed up the training process
