

1. What is the primary function of an Operating System?

- A. Running applications
- B. Managing hardware resources
- C. Providing user interfaces
- D. All of the above

View answer

Answer: D

2. Which of the following is NOT a desirable characteristic of an Operating System?

- A. Security
- B. Complexity
- C. Efficiency
- D. Reliability

View answer

Answer: B

3. What are Utility Programs in an Operating System?

- A. Programs that perform specific tasks for the user
- B. Programs that help in the maintenance and operation of the computer system
- C. Programs that run continuously in the background
- D. Programs that manage file systems

View answer

Answer: B

4. How is disk space allocated in the Contiguous allocation method?

- A. Files are allocated in a linked list structure
- B. Files are allocated in non-contiguous blocks
- C. Files are allocated in contiguous blocks
- D. Files are allocated dynamically

View answer

Answer: C

5. What is the purpose of a Directory Structure in a file system?

- A. To organize files into a hierarchy
- B. To allocate disk space
- C. To control file access
- D. To manage file permissions

View answer

Answer: A

6. What is the primary role of a CPU scheduler?

- A. Allocating memory
- B. Allocating CPU time to processes
- C. Managing files
- D. Handling I/O operations

View answer

Answer: B

7. What is the concept of Threads related to in operating systems?

- A. File management
- B. Process management
- C. CPU scheduling
- D. Memory management

View answer

Answer: B

8. What is Demand Paging in the context of Virtual Memory?

- A. Loading all pages into memory at once
- B. Loading pages into memory only when they are needed
- C. Swapping pages in and out of memory
- D. Allocating fixed-sized partitions for pages

View answer

Answer: B

9. What is a Semaphore in the context of concurrent processes?

- A. A data structure for file management
- B. A tool for deadlock prevention
- C. A synchronization primitive
- D. A CPU scheduling algorithm

[View answer](#)

Answer: C

10. What is the primary purpose of Interrupt Driven I/O?

- A. To speed up CPU operations
- B. To handle input/output operations asynchronously
- C. To control file access
- D. To manage system calls

[View answer](#)

Answer: B

11. What is the primary goal of Deadlock Prevention?

- A. Allowing deadlocks to occur and then resolving them
- B. Detecting deadlocks and breaking them
- C. Designing the system in a way that deadlocks cannot occur
- D. Recovering from deadlocks

[View answer](#)

Answer: C

12. What is the main focus of a Distributed Operating System?

- A. Managing a single computer system
- B. Distributing computing tasks across multiple machines
- C. Enhancing user interfaces
- D. Allocating disk space

[View answer](#)

Answer: D

13. Which of the following is a case study of a contemporary operating system?

- A. MS-DOS
- B. Unix/Linux
- C. Windows 95
- D. Both B and C

View answer

Answer: D

14. What is a common feature of Unix/Linux and Windows operating systems?

- A. Monolithic kernel architecture
- B. Command-line interface
- C. Real-time operating system
- D. Both A and B

View answer

Answer: B
