

How to remove Windows not activated, from Windows 10.

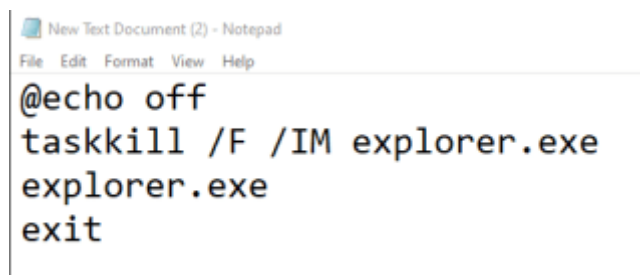

In a blank text document, paste the code.

```
@echo off
```

```
taskkill /F /IM explorer.exe
```

```
explorer.exe
```

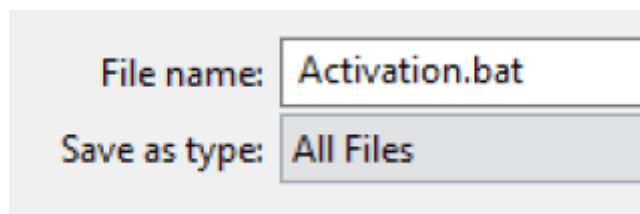

```
exit
```

Save the file as,

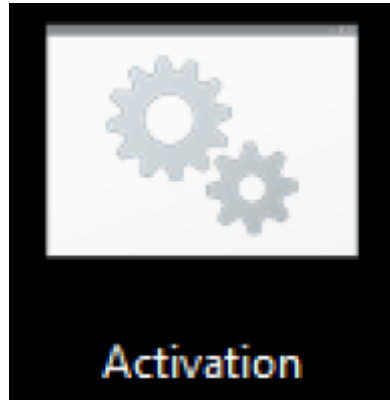

File name: Activation.bat

Save as type: All Files

File will look like this,

Remove Windows not activated from windows 10

Run it as administration.
And restart the computer.
