Vi and its advanced version Vim have three main modes:

1. Command Mode:

- This is the default mode when you open a file.
- Every character typed is interpreted as a command to edit the text.
- Common commands include:
    - i: Enter insert mode.
    - a: Append text after the current cursor position.
    - o: Open a new line below the current line.
    - x: Delete the character under the cursor.
    - dd: Delete the current line.
    - :w: Save the file.
    - :q: Quit the editor.

2. Insert Mode:

- This mode allows you to enter text and edit the file content.
- Any text you type is inserted at the current cursor position.
- To switch to insert mode, press the i key.
- To return to command mode, press the Esc key.

3. Visual Mode:

- This mode allows you to select text for editing or deletion.
- To enter visual mode, press the v key in command mode.
- To move the cursor while selecting text, use the arrow keys.
- To return to command mode, press the Esc key.
