Types of windows:

1. Primary Window:
    - The main window you see when you open an app or start an action.
    - It has the essential menu bar and basic controls.
    - Acts as the foundation for the app’s commands and data.
2. Secondary Window:
    - Additional windows that can be related or independent.
    - Dependent ones open based on a command in the main window.
    - Independent ones can be opened on their own.
3. Dialog Boxes:
    - Boxes that pop up to complete an action in a specific context.
    - They can be triggered by a button click or system conditions.
    - Always appear from another window.
4. Property Sheets and Property Inspectors:
    - Show properties of an object in different ways.
    - Property sheets display all properties, often in a separate window.
    - Property inspectors show commonly used properties dynamically.
5. Message Boxes:
    - Pop-up windows displaying messages about a situation.
    - Provide information or alerts.
6. Palette Windows:
    - Secondary windows with sets of controls.
    - Distinguished by visual appearance (images, colors, patterns).
    - Shorter title bar with only a close button.
7. Pop-up Windows:
    - Display additional information or context-sensitive help.

- Don’t have standard components like title bars and close buttons.
