

Write a program that prints the message "Hello, World!"

C

```
#include <stdio.h>

int main() {
    printf("Hello, World!\n");
    return 0;
}
```

Explanation:

- In C, the printf() function is used to print output to the console.
- The \n at the end of the string is the newline character, which adds a line break after the message.
- The main() function is the entry point of the program, and return 0 indicates a successful execution of the program.

Output:

Output

```
Hello, World!
```
